Lab 3

Total：6 pt.

Note: Be sure to upload results (only necessary files) to **YZU Portal** before the deadline.

Following "**Lab 2**" and "**Tutorial 2**", modify your code to allow users to select a **visible** "**Ogre Head**", change the current vertex of the selected "**Ogre Head**", and then move the current vertex by pressing some keys.

For example, by pressing the key "**h**", the selected index of "Ogre Head" is incremented. By pressing the key "**v**", the current vertex index of the selected "Ogre Head" is incremented. Then, by pressing the key "**+**" (or "**-**"), the 3D coordinates of the current vertex are incremented (or decremented).
